PROFESSIONAL SUMMARY

QA Engineer with 5+ years of experience in functional, regression, exploratory, API, and automation testing of SaaS web applications. Four years as a full-time QA at a product company, followed by freelance QA work with LQ Global Services (legal-tech). Skilled in Selenium (Java), TestNG, Postman, MySQL, and Jenkins. Open to freelance, contract, and full-time roles.

SKILLS & TECHNOLOGIES

Automation: Selenium WebDriver, TestNG, Maven, Jenkins, Apache POI, Page Object Model
API Testing: Postman (REST and SOAP, XML and JSON)
Language: Core Java (OOPS)
Database: MySQL (validation and queries)
Tools: Jira, TestRail
Testing Types: Smoke, Functional, Integration, Exploratory, Regression, UAT, Cross-browser
Other: BRD/FSD analysis, test scenario and test case design, Agile/Scrum

EXPERIENCE

Freelance QA Engineer | LQ Global Services Pvt. Ltd, New Delhi (Remote) **Jan 2025 – Present**

- Provide end-to-end web application testing for legal-tech products (Patrol, LIBIL) as a freelance QA engineer.
- Execute test cases, report and track bugs, and verify fixes, with 95%+ defect closure within sprint cycles.
- Test critical modules including alerts, email notifications, and hearing schedules, improving system stability by 30%.
- Validate Patrol's court data against official sources, reducing data inconsistency by 25%.
- Join sprint discussions and QA planning, reaching 100% test coverage of key modules.
- Support frequent releases and tight deadlines across permission-based workflows and data-driven features.

Quality Analyst (Full-time) | Crocus Robotics Pvt. Ltd, Noida **Dec 2020 – Dec 2024**

- Developed Selenium (Java) automation scripts for functional, regression, and UI testing in a Page Object Model framework.
- Collaborated with product managers and developers to design test cases and ensure coverage of critical workflows.
- Logged, tracked, and verified bugs in Jira and participated in defect triage calls.
- Maintained test plans, test cases, and traceability matrices, and shared reports with development teams.
- Integrated automation suites into Jenkins CI/CD pipelines for faster feedback cycles.

PROJECTS

Patrol, Litigation Management Tool (Freelance, LQ Global Services)

- Functional, regression, and integration testing of Manage Cases, Invoice, Suggestion Alerts, Order Tracker, and Pre-Litigation modules.
- Tech: MySQL, Jira, Selenium (Java), Agile.

LIBIL, Legal Due Diligence and Asset Verification Platform (Freelance, LQ Global Services)

- Functional, exploratory, and regression testing of case search, FIR lookup, and report generation.
- Validated data accuracy in generated reports and tested large-volume searches for performance issues.

Shopper Vapid, B2B eCommerce Platform for Grocery Stores (Full-time, Crocus Robotics)

- Tools: Eclipse, Selenium, Maven, Jenkins, Jira, Postman, TestNG, POM.
- Built automation scripts for regression and smoke suites.
- Implemented a data-driven framework with reusable components.

Credit Solution Hub, Loan, Credit Card and Credit Score Platform (Full-time, Crocus Robotics)

- Tools: Eclipse, Selenium, Maven, Jenkins, Jira, Postman, TestNG, POM.
- Participated in requirement reviews and test planning.
- Executed and documented functional and UI test cases.
- Collaborated with stakeholders for quick issue resolution.

EDUCATION

Graduation, University of Allahabad **2017 – 2020**
